PROFESSIONAL SUMMARY

Senior Civil & Structural Engineer with over 9 years of experience delivering engineering solutions for industrial, commercial, and infrastructure projects. Expertise spans structural and foundation engineering, cost estimation, technical tendering, and multidisciplinary engineering coordination.

Recognized for combining strong engineering judgment with commercial awareness to support technically sound and cost-effective project delivery. Experienced in collaborating with clients, consultants, contractors, and cross-functional teams throughout engineering and tendering processes.

Currently pursuing opportunities in industrial infrastructure and mission-critical projects with a strong commitment to continuous professional development and international collaboration.

CORE COMPETENCIES

- | | | |
|------------------------------------|----------------------------|----------------------------------|
| - Structural Engineering | - Commercial Buildings | - Tender Engineering |
| - Foundation Engineering | - Infrastructure Projects | - Technical Proposal Preparation |
| - Reinforced Concrete Design | - Constructability Review | - Pricing Analysis |
| - Prestressed Concrete Pile Design | - Engineering Coordination | - AutoCAD |
| - Structural Analysis | - Cost Estimation | - Microsoft Excel (Advanced) |
| - Engineering Calculations | - Quantity Surveying | - Microsoft Office |
| - Industrial Facilities | - Bills of Materials (BOM) | |

PROFESSIONAL EXPERIENCE

Southern Concrete Pile Public Company Limited

Senior Civil Engineer

February 2018 – May 2026

- Delivered structural and foundation engineering solutions for industrial, commercial, and infrastructure projects involving prestressed concrete piles, bored piles, and steel pipe piles.
- Performed structural calculations, pile capacity analysis, and engineering design verification in accordance with Thai Industrial Standards (TIS) and Department of Public Works (DPT) standards.
- Prepared Bills of Materials (BOM), cost estimates, technical proposals, and commercial evaluations supporting project bidding and engineering decision-making.
- Evaluated constructability challenges including pile deviation, pile inclination, and site constraints, collaborating with clients, consultants, contractors, and multidisciplinary engineering teams.
- Reviewed engineering calculations, reinforcement detailing, shop drawings, and technical documentation prepared by junior engineers.
- Coordinated engineering, production, quality assurance, logistics, and commercial teams to support project delivery.
- Mentored junior engineers by reviewing engineering documentation and providing technical guidance.

Koranit Construction Co., Ltd.

Office Engineer

August 2016 – August 2017

- Reviewed tender documents, specifications, drawings, and Bills of Materials (BOM).
- Prepared quantity take-offs, cost estimates, tender budgets, and subcontractor evaluations.
- Coordinated engineering information throughout tender preparation and bid submission processes.

EDUCATION

Bachelor of Engineering (Civil Engineering)

Ramkhamhaeng University, Bangkok, Thailand

LANGUAGES

Thai — Native

English — TOEIC 540 (2026)

PROFESSIONAL PROFILE

- Open to International Opportunities
- Available for Relocation
- Interested in Industrial Infrastructure & Mission Critical Projects
